## LEPEX-NOVUM

LEPEX-NOVUM is a high-quality leporine semen extender or preservation medium that contains pharmaceutical and analytical grade ingredients. LEPEX-NOVUM is being manufactured and packaged in 3900 Pelt, Belgium.

LEPEX-NOVUM contains proteins, peptides, soy lipids, salts, vitamins, sugars and antibiotics. The soy components are derived from certified non-GMO (Genetic Modified Organisms) soybeans.

LEPEX-NOVUM contains three antibiotics: Gentamycin (0,23 g/l), Penicillin (0,30 g/l) and Streptomycin (0,40 g/l), which is recommended for use in semen extenders for cooled storage and transport.

As a corollary, we can state that the ingredients that are being used to manufacture LEPEX-NOVUM semen extender do not endanger people nor animals.
