

Certificate of Origin

Description of Product

LEPEX is a high-quality leporine semen extender or preservation medium that contains pharmaceutical and analytical grade ingredients.

LEPEX is delivered as a powder in small, sealed pots that contain 62 gram powder for the preparation of 1 liter semen extender.

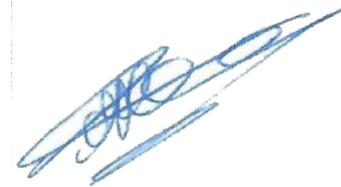

LEPEX powder has been micronized in order to deliver a powder that will dissolve easily in warm water without lump forming.

LEPEX contains the antibiotic kanamycin (0,30 g/l) and enrofloxacin (0,50 g/l), what are recommended for use in semen extenders for cooled storage and transport.

LEPEX is being manufactured and packaged in Pelt, Belgium.

The authorizing official hereby acknowledges the specified country of origin of the product listed above.
